

MAINTANENCE & CLEANING

Regular maintenance and cleaning programme will help to get satisfactory cleaning results and also extend the useful life of mat systems .
Cleaning frequency and the material is decided in conformity with the level of soiling.

Weak Soiling :

Can be cleaned with a powerful vacuum cleaner.

Mid Soiling :

After cleaning the surface of the mat with a powerful vacuum cleaner , mat can be moved / rolled for sweeping the bottom part with a broom.

Heavy Soiling :

In addition to cleaning method of mid soiling, mat can be washed with a high pressure washer and placed back after getting dried a little while.
